

Leila Arboretum [1]

Planting a Brighter Future!

Leila Arboretum Children's Garden

Several small garden plots are located within the Children's Garden and are available to school groups or clubs to adopt for the season.

Gardening is a great way for a youth group to share a healthy activity throughout the summer! This can also help earn points towards a badge or a school project.

Students of all ages will learn about gardening, including selecting plants, organizing space, and tending the plants throughout the season.

They will then see the satisfaction of tasting the fruit of their labor!
